

**A RESEARCH COLLECTION OF
HISTORICAL MAPS AND PRINTS OF THE CARIBBEAN ISLANDS
PART 1: PHOTOGRAPHIC PRINTS, PHOTOCOPIES AND FACSIMILES
(IDENTIFICATION NUMBERS INCLUDED)**

**Wm. C. Found, University Professor Emeritus
York University**

October 13, 2011

INTRODUCTION

Part 1 of the collection of historical Caribbean maps and prints is composed of facsimiles, photographic copies, and photocopies of originals, acquired over a period of approximately 30 years (beginning in 1980). All of the copies were selected for research purposes, primarily for my research on the “Making of the Caribbean Landscape”. The bulk of the copies were purchased from libraries, with the legal understanding that the maps/prints were to be used for personal research – and that duplication or publishing of the items could occur only with the full, written agreement of the library in question. Consequently, the maps/prints in this collection may not be copied. In this report, however, I provide full information regarding each item (if available) so that anyone who wants to obtain a personal copy may do so by contacting a relevant library or map/print dealer. If available, I provide information from the British Library since the on-line ordering of copies from that library is particularly expeditious. The copies in this collection will be available for study in the York University Archives.

Items in the Collection

Most of the items in the collection are maps of individual Caribbean islands, dating from the late 16th to the early 19th centuries. The bulk of the maps are from the 1700s. Seventeen maps cover groups of Caribbean islands, focusing on islands in different parts of the Caribbean Sea and the Gulf of Mexico. The collection also includes a number of prints of engravings, often based on drawings by military artists, depicting a variety of Caribbean locales.

Sources

All of the documents were selected and purchased during personal research visits to libraries and other outlets. The copies of maps (printed and manuscript) and prints were obtained from the following libraries: Bibliothèque Nationale de France, British Library, Harvard University, McGill University, National Archives and National Library of The Netherlands, National Library of Jamaica, National Maritime Museum (Greenwich), Royal Geographical Society (London), Royal Tropical Institute (Amsterdam), Uppsalla University, University of Amsterdam, University of Florida, University of Leiden, and the University of Utrecht. The facsimile copies of maps and engravings were all purchased in the Caribbean islands at a variety of outlets in several Caribbean countries. A number of items were acquired at the shops of the Brimstone Hill Fortress Museum (St. Kitts), the National Museum of Barbados, and the St. Eustatius Historical Society Museum.

The largest single source within libraries is the King's Topographic Collection at the British Library, a magnificent collection of maps and engravings collected by King George III. This collection, eventually donated to the British Museum by King George IV, forms an important core of the British Library's map section.

Uses

The maps and engravings can serve a number of research purposes, although they have been relatively unused by scholars to date. My primary interest has been in information related to the development of Caribbean natural and cultural landscapes, and the items in the collection have proven to be indispensable sources. Particularly noteworthy are the many maps that depict "natural" features (shoreline conditions, ocean depths, coral reefs, topographic features, natural vegetation, comments about climatic conditions): property boundaries; military installations; roads; buildings (housing, mills, factories, churches, etc.); land surveys; agricultural land uses; and urban design. Several maps provide information relating to the pre-Colombian population (e.g. "Indian" villages, trails). Others provide a wealth of information regarding the development of cartographic techniques (e.g. scales, projections, fanciful drawings, depiction of slope and elevation, island profiles as seen from the sea, and various other features related to navigation). In many cases maps of the smaller islands include the names of property owners, information that is crucial for the study of economic and social development, in tracing family relationships among different islands, and in general genealogical research. The maps are interesting for what they do not display (e.g. much information related to slavery), and the few maps that do depict this rare information (e.g. slave housing) represent an important untapped resource for future research. The maps should interest researchers with a general concern for the processes and perceptions reflected in the content and the style of illustration in the maps and engravings.

Organization

The following list of maps/prints is organized alphabetically by island, ending with a general category of "West Indies/Caribbean Region" (for maps of groups of islands). Within each island or category, the maps/prints are listed by order of publication, beginning with the earliest items.

Acknowledgements

As a professional geographer working in the Caribbean region, I have always had a keen interest in the use of historical maps. This interest was piqued when I received my first personal copy of an historical map, as a gift from Jane Couchman. Over the past many years I have received outstanding professional assistance and encouragement from Trudy Bodak, Head of York University's Map Library; and more recently I have received great assistance from another of York's Professional Librarians, Dana Craig. To these wonderful people, and to the many others, in and outside of the Caribbean, who have offered access to historical maps and assistance with interpretation, I offer my heart-felt thanks.

Country: Barbados

Full Title: Barbadoes, surveyed by William Mayo, engraved and improved by Thomas Jefferys, Geographer to the Kind. London, printed for Robt. Sayer, Map & Printseller, no. 53 in Fleet Street as the Act directs 20 Feby 1775.

List No: 4723.034

Page No: X

Series No: 53

Publication Author: Jefferys, Thomas

Pub Date: 1788

Pub Title: *The West-India atlas: or, a compendious description of the West-Indies: illustrated with forty one correct charts and maps, taken From actual surveys. Together with an historical account of the several countries and islands which compose that part of the world.*

Pub Reference: cf NMM 360 (1775 edition), 366 (1796 edition); P2701 (1787 edition).

Pub Note: This is a superb atlas of the West Indies and a companion atlas to Jeffery's American Atlas also first issued in 1775. The latest date on the charts in this copy is 1788 (The Cape Verd Islands). There is a beautifully illustrated title page that precedes the main title page, which reads "The West Indian Atlas..." Jefferys died in 1771; Sayer and Bonnet acquired his materials in preparation for this atlas, and published the atlas posthumously under his name (as they did with the American Atlas) in 1775. The heart of this atlas and the most detailed part is the sixteen sheet large chart and index sheet of the whole of the West Indies. The rest of the atlas consists of charts of the Atlantic Islands and the British Channel, as well as individual maps and charts of seventeen islands in the West Indies. Twenty seven pages of text gives the sources for the maps and charts,

and a historical account of the West Indies. Three of the large chart maps also appeared in the American Atlas. Comparing the two Florida sheets in this atlas to the same sheets in the 1775 American Atlas, numerous changes to the coast lines and other features appear. That would indicate that Sayer updated the charts as the atlas was reissued - Phillips shows issues of 1775, 1781, 1787, 1794, 1796, 1807, and 1818. With the 1794 and later editions, 20 maps are added of various additional islands. Sayer and Bennet also published in 1775 a smaller version of this atlas called "The West India Islands: From Actual Survey and Observations..." that consisted of the same text, a general chart of the Islands, and the same sixteen or seventeen (depending on the edition) charts of the islands that appear in the larger version (P3942). Finally, Jefferys himself published in 1762 "A Description of the Spanish Islands and Settlements on the Coast of the West Indies" which was issued in quarto, with a general chart and 32 maps and plans of harbors and towns (P3941).

A Plan of the City and Harbour of Havana, (24) 18th century, Milton, black and white, photocopy, 57 by 41 c.m..

Although this item does not appear in the British Library on-line catalogue, the photocopy was purchased from the British Library. The map is found in the King's Topographic Collection, volume 123, no. 22.

Plano de la Ciudad y Puerto de la Havana, (25) por Don T. Lopez, Madrid, 1785. Three copies: black and white photocopy (18 by 25 cm.); black and white photocopy (37.5 by 41 cm.); and black and white photograph (37.5 by 41 cm.).

Note: although this map is listed in the British Library printed catalogue (1967), it is not documented in the BL on-line integrated catalogue. Nonetheless, the copies in the York collection were purchased from the British Library (Maps 143.d.12.(9)).

The following description of the map is copied from Cartografía del siglo XVIII: Tomás López en la Real Academia de la Historia, Madrid, 1997.

168. LA HABANA (CUBA) (PUERTOS). CARTAS NÁUTICAS. 1785

Plano de la Ciudad y Puerto de La Havana / Por Don Tomás López. Geógrafo de los Dominios de S. M. — Escala [ca. 1: 12,500]. 1000 varas castellanas (= 6,7 cm). — Se hallará en Madrid, con todas las obras del Autor y las de su Hijo, en la Calle de Atocha, frente de la Aduana vieja : [Tomás López], 1785.
1 carta náutica : grab., col. ; 36,8 x 39,5 cm.

En el ángulo superior derecho nota sobre las fuentes manejadas para la formación del «Plano de esta ciudad y puerto»: Tomás Jefferys, Bellin y «algunos manuscritos nuestros». Seguramente también manejó el plano manuscrito de Andrés Reggio, regalado a la Academia por el académico Benito Gayoso en 1773 (véase n.º 168).

Orientado con torre, con el N al O de la carta. — Sondas, arrecifes y bajos arenales. Costa sombreada. Arbolado y zonas de cultivo.

En: *Mapas de América, pertenecientes a la Real Academia de la Historia*, Madrid, [1791], n.º 11.

Impreso en papel verjurado e iluminado a la aguada en verde.

Presenta una carta náutica del puerto de La Habana y un plano detallado de su ciudad fortificada. En el ángulo superior izquierdo tabla explicativa de los principales puntos del puerto identificados en la carta por clave alfabética. «Nota: los números de la Sonda son brazas Castellanas de agua, la que aumenta en las mayores mareas 3 pies». En el ángulo superior derecho «Explicación de la Ciudad», con relación de edificios localizados en el plano por clave numérica.

En el ángulo superior derecho anotado en tinta de bugalla: «11».

Aunque no consta en los Libros de Actas, cabe suponer que Tomás López lo regalase a la Academia para incluirlo en el Atlas.

R. 862. Sign. C/Atlas A, 11

Jamaica According to the Last Survey, (44) 1677, Wood, black and white photograph, 29.5 by 36 cm..

Note: I acquired this photographic copy from the National Library of Jamaica. That library's copy had been donated by Samuel Eliot Morison, the Harvard Professor who wrote the Pulitzer-prize winning book, Admiral of the Ocean Sea (one of the primary histories of Christopher Columbus). In the course of his research, Morison re-sailed Columbus's routes through the Caribbean islands, having collected a series of historic maps at the Seville archives, among other sources.

Information from the catalogue of the John Carter Brown Library at Brown University, Boston.
Note: the map described below is not identical to the map in the York collection, but it is an earlier or later edition of the same – and is nearly identical.

Collection: JCB Archive of Early American Images

Inscription: verso: Moxon's Jamaica.
Languages: English
Description: Map of Jamaica. Cartographic elements include locations of settlements, bays, and rivers, degrees of latitude and longitude, sea banks, soundings, some topographical details, compass rose, and a scale. Settlements in the image are lettered for identification in key below. Decorative cartouche contains the coat of arms of Jamaica flanked by native Americans wearing feathered garments with bow and bowl of fruit. Dedicatory cartouche to Captain John Wood contains Wood's coat of arms [?]. Decorative elements include ships, sea monsters, military matériel such as cannons, flags, and drum, various animals such as horses, cattle, sheep, alligators, and pig, and plants such as the pineapple, along with a scene of warfare and naval warfare. Also includes a black man [slave] holding a bundle of sugar cane reeds.
Description notes: One of four maps of Jamaica in the Blathwayt Atlas; this map is second in chronological order and is the Moxon version of John Man's second map. John Man was surveyor general of Jamaica from 1661 to his death sometime around 1671 (see 8189-35). The Blathwayt Atlas is a collection of 48 maps assembled between 1680 and 1685 as a reference atlas for the Office of Trade and Plantations, compiled by William Blathwayt, Secretary to the Lords of Trade and Plantations.
Time Period: 1651-1700
Subject Area: Artifacts, industry, and human activities; Flora and fauna; Indigenous peoples; Geography, maps, city views and plans
geographic area: Caribbean Islands
Subject headings: Caribbean area--Maps
References: Black, J.D., ed. Blathwayt Atlas, vol. II, p. 186-196

Carta de la Isla de la Martinica, (60) 1781, Lopez, black and white photocopy, 30 by 32 cm..

Information from the catalogue of the Real Academia de la Historia:

Sección: General

Número de control: RAH20101000425

Título uniforme: La Martinica (Pequeñas Antillas) (Isla).
Mapas generales. 1781

Título: Carta de la Isla de La Martinica [Material cartográfico] /
Por D. Juan López, Pensionista de S. M.

Área de datos: Escala [ca. 1:245.100]. 15 Leguas Marinas, que se usan en España, Francia, e Inglaterra, de las que entran 20 en un grado [= 34 cm]

Publicación: Se hallará ésta con los míos, y los de mi Padre en Madrid Calle de las Carretas :
[Juan López], año de 1781

Descripción física: 1 mapa : grab., col. ; 38 x 41,5 cm

Notas: Copia Digital. Real Academia de la Historia: 2010

López Gómez, Antonio y Manso Porto, Carmen, Cartografía del siglo XVIII. Tomás López en la Real Academia de la Historia, Madrid, Real Academia de la Historia, 2006, n.º 177, p. 422

A la izquierda escala gráfica en vertical junto a las latitudes. En la parte superior meridiano de origen: "Longitud Oriental del Pico de Teide". Márgenes graduados de 1º en 1º y de 5' en 5'.

Orientado con torre en nudo de rumbos. Indica los cuatro puntos cardinales. Sondas, fondeaderos, bajos arenales y arrecifes. Relieve por montes de perfil. Costa iluminada a la aguada en verde, con abundante toponimia

Restaurado en 1997

En el ángulo inferior izquierdo cartela del título en cornucopia con marco oval moldurado
Sumario: Presenta una carta náutica de la isla de La Martinica. En el ángulo superior derecho nota sobre el término "Cul de sac" o "Callejón sin salida", que en el mapa va abreviado con la palabra "callejón", y "Morne", que significa "Cabo elevado, o una Montaña pequeña que entra en el Mar". Más abajo "explicación de las señales" (molinos, habitaciones, anclajes, etc.)

En el ángulo superior derecho inserta larga nota sobre el trabajo ejecutado por diferentes astrónomos para fijar la posición de la isla y sobre los mejores mapas realizados hasta el momento. Transcripción de ambas notas, de un ejemplar conservado en el Servicio Geográfico del Ejército, en Cartografía y relaciones históricas de Ultramar, t. IX, Grandes y Pequeñas Antillas, 2.ª parte, n.º 282, pp. 235-237

En el ángulo superior derecho anotado en tinta de bugalla: "20"

Seguramente es el ejemplar regalado por Tomás López en junta académica de 28 de septiembre de 1781

An Accurate Map of the Islands of St. Christophers and Nevis, (100) Fielding, 1782, coloured, facsimile, 45 by 54 cm. (two copies).

Information from Pennymead.com:

1782 *An Accurate map of the islands of St Christophers and Nevis in the West Indies. By an Officer. With the position of the English and French Fleets. February 7th 1782. I. Fielding, London 1782 Engraved map of the islands with good detail of roads and villages*

View of Brimstone Hill Fortress, St. Kitts (untitled), (101) 18th century (?), engraving, coloured, facsimile, 33 by 54 cm.. No information available. Purchased from the Brimstone Hill Fortress shop, St. Kitts.

Charles Town, Nevis, (102) 18th century (?), engraving, coloured, facsimile, 10 by 32 cm.. W.S. Andrews, H.C. Trery Lith., W. Spreat (Exeter). No additional information available. Purchased at the Brimstone Fortress shop, St. Kitts.

View of the Town and Harbour of Basse Terre in the Island of St. Christopher, (103) 1808, engraving, coloured, facsimile, 16 by 56 cm..

The image comes from the following publication:

Coke, T. 1808. A History of the West Indies, containing the Natural, Civil, and Ecclesiastical History of each Island: with an account of the Missions instituted in those islands, from the commencement of their civilization; but more especially of the Missions which have been established in that archipelago by the Society late in connexion with the Rev. John Wesley. 3 vols.. Printed by Nuttall, Fisher, and Dixon, Liverpool. The image is in Vol. II, opposite p. 36.

View of the Methodist Chapel in Charlestown in the Island of Nevis, (104) 1811, engraving, coloured, facsimile, 18 by 25 cm..

Purchased at the Brimstone Fortress shop, St. Kitts.

Information from the Virginia Foundation for the Humanities and the University of Virginia Library:

Source: Thomas Coke, A History of the West Indies (London, 1811), vol. 3, after title page. (Copy in the John Carter Brown Library at Brown University)

Comments □ *Caption, "A view of the Methodist chapel in Charlestown in the island of Nevis". The Methodist congregation in Nevis was established in the late 1780s or early 1790s; by 1802 it numbered 900 "coloured people and blacks" (Coke, p. 27). The original structure of the chapel shown on the right was built around 1797. In the foreground are free women of color and slaves, apparently dressed for Sunday services. In the British Library copy, this illustration is found in vol. 2 (London, 1810).*

Engraver or Printer: B.T. Welch & Co.

Published In: A General Atlas Containing Distinct Maps Of all the Known Countries in the World, Constructed from the Latest Authority. Written and Engraved by Jos. Perkins, Philadelphia.

Baltimore: Published by Fielding Lucas, Jun. No. 138, Market Street. Baltimore. Entered ... by F. Lucas Jr. of the State of Maryland June 3, 1823.

Publication Author: Lucas, Fielding Jr.

Publication Date: 1823

Publication Reference: P742.

Publication Note: The first edition, first state (see our first edition, second state for comparison)

of Lucas' best general atlas and the finest general atlas produced in the U.S. at that time (In asserting this we omit the Tanner and Finley American Atlases of 1823 and 1826 respectively because they were not general atlases - cartographically they may have been superior to the Lucas, but not as broad in coverage). The quality of the engraving (most of the U.S. maps were engraved by B.T. Welch, others by Young & Delker, J.V.N. Throop, Cone & Freeman, and Kneass) is superb, the detail is very fine, and the coloring is delicate and elegant. While the same Lucas drawn base maps were used in this atlas and the 1822 American Atlas by Carey and Lea (and thereby created strained relations between him and Carey and Lea), the maps in this Lucas Atlas are far superior in quality - Welch reengraved many of the maps for Lucas that Young & Delker had engraved for Carey and Lea. It is interesting to note that the Carey and Lea maps are usually earlier states of the Lucas maps. The Atlantic Islands and the West Indies Island Maps are mostly copied from Thomson's General Atlas of 1817 (see our copy) as is the Mountains and Rivers plate (reduced). Many maps are derived from the earlier Lucas Atlas of 1815-17 which copied the Oddy Atlas maps for the non U.S. state maps. Some copies have solid color. Maps of Mexico, Canada, and N. America (updated by Lucas in the arctic), are copied from Arrowsmith's General Atlas of 1823 (first ed. was 1817). The classical maps derive from Melish's Atlas of Ancient Geography of 1815. Half leather with marbled paper covered boards, thick outline color, title on spine - "Lucas's Cabinet Atlas."

Publication Author:

Jefferys, Thomas

Pub Date:

1788

Pub Title:

The West-India atlas: or, a compendious description of the West-Indies: illustrated with forty one correct charts and maps, taken From actual surveys. Together with an historical account of the several countries and islands which compose that part of the world.

Pub Reference:

cf NMM 360 (1775 edition), 366 (1796 edition); P2701 (1787 edition).

Pub Note:

This is a superb atlas of the West Indies and a companion atlas to Jeffery's American Atlas also first issued in 1775. The latest date on the charts in this copy is 1788 (The Cape Verd Islands). There is a beautifully illustrated title page that precedes the main title page, which reads "The West Indian Atlas..." Jefferys died in 1771; Sayer and Bennet acquired his materials in preparation for this atlas, and published the atlas posthumously under his name (as they did with the American Atlas) in 1775. The heart of this atlas and the most detailed part is the sixteen sheet large chart and index sheet of the whole of the West Indies. The rest of the atlas consists of charts of the Atlantic Islands and the British Channel, as well as individual maps and charts of seventeen islands in the West Indies. Twenty seven pages of text gives the sources for the maps and charts, and a historical account of the West Indies. Three of the large chart maps also appeared in the American Atlas. Comparing the two Florida sheets in this atlas to the same sheets in the 1775 American Atlas, numerous changes to the coast lines and other features appear. That would indicate that Sayer updated the charts as the atlas was reissued - Phillips shows issues of 1775, 1781, 1787, 1794, 1796, 1807, and 1818. With the 1794 and later editions, 20 maps are added of various additional islands. Sayer and Bennet also published in 1775 a smaller version of this atlas called "The West India Islands: From Actual Survey and Observations..." that consisted of the same text, a general chart of the Islands, and the same sixteen or seventeen (depending on the edition) charts of the islands that appear in the larger version (P3942). Finally, Jefferys himself published in 1762 "A Description of the Spanish Islands and Settlements on the Coast of the West Indies" which was issued in quarto, with a general chart and 32 maps and plans of harbors and towns (P3941).

Attacks of St. Lucie, December, 1778, (109) black and white photocopy of manuscript map, 28 by 37 cm.. Manuscript, hand-drawn map in the General State Archives, The Hague, Netherlands (VEL 1435).

Information regarding the famous attack from the Global Gazetteer of the American Revolution (gaz.jrshelby.com):

"December 1778 12 ships and 6000 men attacked the French island of St. Lucia. In 2 weeks they defeated the French garrison of 13,000 men. Dividing his force, Major-General Grant selected the flank companies of 8 regiments (including from the 28th) to form a Grenadier and a Light Battalion (1,300 men) and placed them at La Vigie. It was against these men that the 12,000 French launched an attack.

"During the battle, solid masses of French were advancing on the slender British lines, our ammunition got down to the last few rounds. Colonel Meadow gave the order "Cease fire," intending to give one final volley and then finish the battle with the bayonet. At the order, in the full heat of battle, with the enemy in vastly superior numbers advancing on them, every single soldier lowered his musket and stood, waiting for death. It was a manifestation of discipline which even amazed some of the officers present."

With that final volley the French advanced stalled and they fell back. 1,300 men had defeated 12,000. Within 2 weeks the French had abandoned the island."

ST. MARTIN

Carte de L'Isle St. Martin, (110) 1774, black and white photocopy, 24 by 34 cm..

This copy was obtained from the Map Library of the University of Amsterdam, but the item can not be found in the University's on-line catalogue.

WEST INDIES/CARIBBEAN REGION

Hispaniolae, Cubae, Aliarumque Insularum Circumiacentium, Delineatio, (125) 1598,

Ortelius, black and white photocopy, 36 by 50 cm..

Information from the catalogue of Paulus Swaen Old Maps:

Publisher : ORTELIUS, A. □ *Title* : Culiacanae, Americae Regionis
Discriptio / Hispaniolae, Cubae, Aliarumque Insularum Circumiacentium,
Delineatio □ *Published in* Antwerp, 1579.

□ *Size* : 13.8 x 19.7 inches. / 35.0 x 50.0 cm. □ *Colouring* : Coloured.

Description : Two great early maps of important regions in the New World. The first covers the region of western Mexico around Culiacan and the Spanish settlement of Villa S. Michael's, the region noted for its silver mines. □ The second is the first detailed map of the Greater Antilles with detail in southern Florida and the Caribbean that is quite remarkable for the period. The map includes an interesting error in that the Tropic of Capricorn is shown where the Tropic of Cancer should be. □ Ortelius based the maps on a variety of sources including Mercator's world map (1569) and other maps by Gutters and Alone De Santa Cruz. Three strapwork cartouches and sailing ships decorate the map. German text on verso.

Carte d'une Partie de L'Amérique par la Navigation des Isles et du Golfe de Mexique, (136)

1740, Buache, black and white photocopy, 92 by 50 cm..

Information from the catalogue of the Philadelphia Print Shop, Ltd.:

Philippe Buache after Henry Popple. "Carte d'une Partie de l'Amérique pour la Navigation des Isles et du Golfe du Mexique avec l'interieur des Terres depuis la Bermude jusqu'a Cayenne." Paris: P. Buache, 1740. 19 1/4 x 36 5/8. Engraving. Very good condition. Lowery: 358.

A rare sea chart of the West Indies and surrounding lands by Philippe Buache. Though Buache had drawn a manuscript map of the Gulf region before Popple's map was published, he updated his rendering to take into account the improved information. Though the focus is on the navigational information, with soundings, shoals, currents, and so forth, Buache includes much information of the interior of South America, Central America, and what the southern part of present-day United States from Texas to Georgia. With its large size and typical French attention to detail, this is one of the best maps of the region from the first half of the eighteenth century.

Isles D'Amérique dites Caribes ou Cannibales et de Barlovento, (137) early 18th century, d'Abbeville, Paris, black and white photocopy, 26 by 34 cm..

Although this item does not appear in the on-line catalogue of the British Library, the item is contained in the King's Topographic Collection, Vol. CXXIII, no. 63.
