The Clippinger Class-Method of Voice Culture

by D. A. CLIPPINGER

An altogether sane, balanced and practical text book by one of America's eminent authorities on the voice. It contains 132 pages of instructive text, technical exercises, melodic studies, and carefully chosen songs and duets.

The author's deep study of the voice together with his long experience in solving difficult vocal problems in the studio has enabled him to rid the subject of vagary, mystery, and uncertainty, and state the principles of voice-training so clearly and simply that they may be understood by anyone.

A FEW BASIC PRINCIPLES

A tone is *something to hear.* Therefore, to be right it must satisfy the trained ear.
A good tone is *easily produced.* It is the bad tone that is difficult.
A considerable part of voice-training must be devoted to *getting rid of resistance*, that is, effort at the wrong point.
Good voice-production is based on the *right idea* of tone and right conditions of the instrument.
The study of singing should be *an invigorating and inspiring form of* exercise.
To sing *well* is an accomplishment *well* worth the time and effort involved.

AIM OF THE BOOK

An adequate treatment of breath-control, vowel-formation, vowel-color, tone-quality, resonance, consonants, phonetic spelling, diction, the head voice.
Ample exercises for flexibility.
An illuminating discussion of interpretation, and how to study a song.
An outline of the principles of interpretation as a basis of criticism.
Purchase of outside material unnecessary.
The book is COMPLETE in itself, with ample text, nearly 150 exercises and studies, 25 songs and 7 duets.

It contains twenty-three second-year songs, including two duets, from the works of Brahms, Densmore, Franz, Fisher, Grieg, Henschel, Jensen, Manney, Schubert, Schumann, Sinding, Strickland, Tchaikovsky and Watts.

The editors have added helpful notes to each of the songs and the volume includes hints on Teaching Procedure, Diction, and the Principles of Singing.
