Life can change in an instant, from a colourful hello to a seemingly empty goodbye, you can never tell where a moment shall lead you. *Run Lola Run*, originally a German screenplay by Tom Tykwer, focuses on these beats of life. We see within these beats of fate and circumstance, the chance to draw upon our collective will to constructively enhance our life together.

The more people, the more energy; the more energy, the more creation; the more creation, the more to experience. Sometimes we are blinded by false constraints and forget to look beyond the invisible. With our production we attempt to colour your world. — Mikko&Molly
