Easy Bibliography

Cross platform

WizFolio supports all the latest versions of **Mac, Windows and Linux**.

Import (WizAdd)

Bibliographic data directly from over 200 scientific publishers (IEEE, Springer Wiley, Nature, Science) and databases (Google Scholar, Scopus, ISI, JSTOR, Proquest, etc) using **WizAdd**, our Web Importer. Also automatically imports free PDFs into your online collection.

Browsers

Works on all major browsers such as Internet Explorer, Firefox, Safari and Chrome.

Cite

Collaborative citing across OS and document formats with patent pending citation technology. Have plugins for Microsoft Word (Win), OpenOffice (Win, Mac, Linux), **Google Docs**, Google Sites, Zoho Writer and WordPress.

Overview: WizFolio

The screenshot displays the WizFolio web application interface. The top navigation bar includes 'WizFolio', 'Search', 'People', 'Blog', 'Help', 'Subscriptions', 'Feedback', 'WizAdd', 'WizCite', 'Settings', and user information 'rajivn@yorku.ca | My Profile |'. Below the navigation bar is a toolbar with icons for 'Add', 'Delete', 'Journal Abbr.', 'Export', 'Email', 'Share', 'Upload', 'Locate PDF', 'Edit', and 'Notes'. The left sidebar contains a 'Folder Panel' with a tree view of folders: 'ALL Items', 'Recycle Bin', 'My Collections', 'Samples', 'Articles from Databases' (with sub-folders like BMC, dance, GoogleScholar, JSTOR, New Folder, Proquest, Pubmed, sage, SciFinder:From Pubmed, Scopus), 'Books', 'Library Catalogue', 'PBR', 'Videos', 'Websites & Blogs', and 'Wiztest1'. The main area is divided into an 'Item Panel' showing a list of 23 items with columns for ID, year, and title. The 6th item is highlighted: '2008 Attention biases decisions but does not alter app...'. Below the list is an 'Advanced Search (Pubmed)' form with fields for 'All Fields', 'Any of the Author(s)', 'Title (Partial or Full)', 'Journal Name', 'Volume', 'Issue', 'Page', 'Affiliation', and 'From - Present'. The right side features a 'Preview Panel' for the selected item, showing the journal title 'Journal of vision 8 (15): 3:1-10, 2008 Nov 10 (Abbr: J Vis)', the article title 'Attention biases decisions but does not alter appearance.', authors 'Schneider, Keith A; Komlos, Marcell', and a detailed abstract. The bottom status bar shows '36 items', 'Summary', 'View', 'Sort By', and 'Find'.

Attention biases decisions but does not alter appearance.
Schneider, Keith A; Komlos, Marcell

Recently, M. Carrasco, S. Ling, and S. Read (2004) reported that transient visual attention increases the perceived contrast of Gabor grating targets. We replicated their study using stimuli and their results, we discovered that attentional decision that subjects perform (comparative targets equal to an equality judgment (") to an equality judgment (") are that the difference between was not due to performed a control experiment subjects were instructed on a trial-by-trial basis which judgment to perform only after disappeared. In this experiment, the magnitude of attentional effect for the comparative diminished but still significant and the equality judgment still measured no effect. We reported effects of attention upon appearance can be entirely explained by decision bias attention does not alter appearance.

PubMed: University of Toronto

The screenshot shows a Mozilla Firefox browser window displaying a search result on the University of Toronto's PubMed page. The search query is "enzymes+AND+University of Toronto[affl]". The search results list 18 items, with the third item highlighted: "2011 Impaired social recognition memory in Recombination Activating Gene 1-deficient mice".

Brain research , 2011 Feb 23

Impaired social recognition memory in Recombination Activating Gene 1-deficient mice.

McGowan, Patrick O; Hope, Thomas A; Meck, Warren H; Kelsoe, Garnett; Williams, Christina L

The Recombination Activating Genes (RAGs) encode two **enzymes** that play key roles in the adaptive immune system. RAG1 and RAG2 mediate VDJ recombination, a process necessary for the maturation of B- and T-cells. Interestingly, RAG1 is also expressed in the brain, particularly in areas of high neural density such as the hippocampus, although its function is unknown. We tested evidence that RAG1 plays a role in brain function using a social recognition memory task, an assessment of acquisition and retention of conspecific identity. In a first experiment, we found that RAG1-deficient mice show impaired social recognition memory compared to mice wildtype for the RAG1 allele. In a second experiment, by breeding to homogenize background genotype we found that RAG1-deficient mice show impaired social recognition memory relative to heterozygous or RAG2-deficient littermates. Because RAG1 and RAG2 null mice are both immunodeficient, the results suggest that the memory impairment is not an indirect effect of immunological dysfunction. RAG1-deficient mice show reduced habituation to non-socially derived odors and habituation to an open-field, indicating that the observed effect is not likely a result of a general deficit in habituation to novelty. These data trace the origin of the impairment in social recognition memory in RAG1-deficient mice to the RAG1 gene locus and implicate RAG1 in memory formation.

Rajiv Nariani

Institution: York

Position: Teacher

Research Interests: e-books, reference management tools for graduate research, library science, open access publishing, scholarly communication

About me: Rajiv Nariani M.Sc. in Dairy Microbiology (NDRI, India), MES (York University), MIST (University of Toronto) Science Librarian Steacie Science & Engineering Library York University Libraries York University Rajiv is a Science Librarian at Steacie Science & Engineering Library, York University. His subject areas include Kinesiology & Health Sciences, Neurosciences, Mathematics & Statistics. He is currently working on projects related to e-books, reference management tools for graduate research & open access publishing.

The screenshot displays the WizFolio application interface. The top navigation bar includes 'WizFolio', 'Search', 'People', 'Blog', and 'Help'. Below this is a toolbar with icons for adding, deleting, journaling, exporting, emailing, and sharing. The left sidebar shows a hierarchical view of collections, with 'pubmed' highlighted. The main content area lists four items, with item 4 selected. A context menu is open over item 4, showing options to flag items with various colors: Blank, very useful (highlighted), Blue, Yellow, Green, Orange, and Purple. The right sidebar shows a preview of the selected item's content.

Gut-brain signalling: how lipids can trigger the gut.

Breen, Danna M; Yang, Clair S; Lam, Tony K T

The gut plays a unique role in the metabolic defence against energy excess and glucose imbalance. Nutrients, such as lipids, enter the small intestine and activate sensing mechanisms to maintain energy and glucose homeostasis. It is clear that a lipid-induced gut-brain axis exists and that cholecystokinin and a neuronal network are involved, yet the underlying mechanisms in gut lip sensing that regulate homeostasis remain largely unknown. In parallel, studies underscore the importance of enzymes involved in lipid metabolism within the brain, such as adenosine monophosphate -activated protein kinase, to maintain homeostasis. In this review, we will first examine what is known regarding the mechanisms involved in this lipid-induced gut-brain
